CCO 314, SAMPLING AND TESTING A354 GRADE BD MATERIAL:

PIER 7 MATERIAL PURCHASE: This morning at approximately 0700, I discuss with Bob Kick and Anthony Garcia of ABF purchasing duct tape for use in labeling rods to be cut for sampling and testing. Most of these locations are at the PWS anchor rod stickout on the backside of the anchorage. The duct tape will be applied to the rods/threads and will be used as a base to apply Sharpie or Paint Pen labels with material sample ID. ABF has a box/carton of duct tape available, so I take that at 0700 and ABF orders a replacement box/carton of duct tape. There are a total of 24 rolls of duct tape in the purchased box/carton. The duct tape is 3M, 2979, silver, 1.88 inch x 60 yards.
